

1. Minimum width of driveways is 12'.
2. All parking spaces shall open directly upon an aisle or driveway with such width and design as to provide safe and efficient access and egress for the vehicle.
3. The requirements shown are minimum standards and it may be to your advantage to use larger dimensions in some cases.
4. Where parking spaces abut a sidewalk or public area, appropriate bumper guards must be installed to prevent encroachment.
5. Parking plans may be refused where it is necessary to back a vehicle into a heavily traveled street.
