GOT? ANTS!

Don't play around with spray
when there are better ways
to keep ants away.

GET SERIOUS!

1. Spot

where the ants are coming in.

2. Eliminate

crumbs, messes, and spills.

3. Rinse

ants away with soap and water.

4. Isolate

food and water sources.

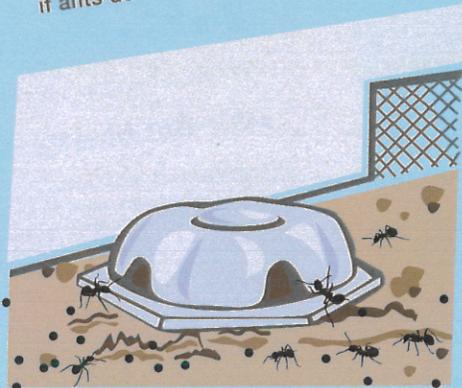

5. Obstruct

entryways by sealing cracks.

6. Use Baits

if ants don't go away after a few days.

7. Stick to it

to keep ants away!
